

Chinese health specialists **shared** their experiences of the **struggle against COVID-19** with **Mexican doctors** during an **online conference** coordinated by [Innovation HUB Tec-China](#).

Doctors from the [Chinese Center for Disease Control](#) and Mexican doctors from public and private hospitals in **Nuevo León, Jalisco, San Luis Potosí, Oaxaca, and Guerrero** took part in the conference, entitled **China's Experiences in COVID-19 Prevention and Control**.

*"This is one of the first results of an initiative called the **COVID-19 Mexico Challenge**. It was attended by **more than 40 Mexican doctors and Chinese doctors** who were at the epicenter of the epidemic in **Wuhan**," explained **Patricia Mora**, Director of Global HUB Innovation at the Tec.*

SHARING THEIR EXPERIENCES OF THE PANDEMIC

The conference was held on April 2. For approximately 3 hours, these **Chinese and Mexican health experts** discussed **5 areas of attack** against COVID-19:

1. Hospital preparation
2. Virus testing
3. Protection of health workers and patients
4. Evaluation and isolation of patients
5. Treatment of patients

Experts from **Zhejiang province**, who attended cases in **Wuhan**, also spoke about **traditional Chinese medicine**, such as the use of **medicinal plants** to alleviate the symptoms of **COVID-19**.

“The call for Mexican doctors was made through [TecSalud](#). We received support from the Chinese government and Alibaba for making the connection through [Innovation HUB Tec-China](#),” she added.

This videoconference was recorded in order to share any valuable information that arose during the expert discussion with hospitals and the media from both countries.

A COLLABORATIVE PARTNERSHIP

***[“Innovation HUB Tec-China](#)** has always played a very active role in all areas to do with technology transfer and innovation, and the Tec has been working very closely with our office there.*

*“These are some of the actions that the Chinese government has promised to support us with as partners, to provide us with this **training and experience** so that we can share it with Mexican doctors,” said Mora.*

Innovation HUB Tec-China emerged from the **partnership** between **Tec de Monterrey**, the **Mexico-China Center** and the **Jianggan district government**, of the city of **Hangzhou**, which is in the province of Zhejiang.

This forms part of the Tec’s strategy to **forge connections with successful innovation ecosystems** across the world, such as **China**, which has turned **science and technology** into the catalysts of its economy.

The full conference is also available on Innovation HUB Tec-China’s **[Facebook](#)** page, on its **[YouTube](#)** channel, and via this **[Google Drive](#)** link.
